

**SAENPHUM NANTA**  
**PROGRAMMER | FULL-STACK**  
**WWW.DEVBY9SAEN.COM**

## INFORMATION

Name : Saenphum nanta  
DOB : 11/02/1994  
Mail : [saenphum.sumpradit@gmail.com](mailto:saenphum.sumpradit@gmail.com)  
Phone : (+66)65-145-9824  
Location : Lumphun, thailand

## INTEREST

**Expected Position:** Developer  
**Expected Salary:** 50,000 THB  
Or according to the company structure  
**Available to Start:** 10/Mar/2025

I am looking for a job that can be done 100% remotely (WFH). However, during the probation period, I am willing to work on-site 100% as well.

## LATEST POSITION

**Position:** Developer  
**Salary:** 40,000 THB  
**Work location:** WFH 100%  
**Reason for leaving the job:**  
Participating in local elections

## EXPERIENCE

### **ELECTION CANDIDATE • DEC/2024 – – FEB/2025**

Candidate for the Provincial Administrative Organization Council of Lamphun, People's Party

### **PROGRAMMER • FREELANCE • APR/2019 – – DEC/2024**

I am seeking additional experience through freelance work, particularly with PHP, as it is easier to support. I have successfully completed over 10 projects throughout my time as a freelancer.

### **PROGRAMMER • EXCELLENCE SIAM • APR/2018 – DEC/2024**

I have gained 6 years of experience in programming and learning system management using languages such as C#, Python, C++, VB, and Java. I have collaborated with several companies including Misumi, Toyota, Fujitsu, and Innova, among others. In addition to my hard skills, I also possess soft skills such as philosophy and management.

### **PROGRAMMER • BITRAS • NOV/2015 – MAR/2018**

I began programming during my time at university, working on various projects with my professors. One of my proudest achievements was managing the Train Simulator project, which was used for training subway train operators for BEM (Bangkok Expressway and Metro). I was also part of the team developing a Train Simulator for the high-speed rail project with NECTEC. I left my previous position because I graduated and that time seeking to gain more experience.

## EDUCATION

---

**University:** King Mongkut  
University of Technology  
North Bangkok (KMUTNB)

**Degree:** Bachelor

**Department:** Mechatronics

## TECHNICAL SKILL

---

**Strong :** .net C#, VB.net, VB6, C# MVC, MS SQL, MySQL, JAVA  
Spring boot, PHP, Solidwork, AutoCAD, GCode, Arduino(C++),  
RaspberryPi(python), PLC

**Average :** python, Flutter(dart), C++, AWS, Docker, git,  
TortoiseSVN, SourceTree, Postman, CrytalReport

**Beginner :** Vue, angular, django, TypeScript, react

## ABOUT ME

---

I am looking for a job where I can make the most of my skills and continuously develop my capabilities. I acknowledge that I have certain shortcomings, but one thing I am confident in is my programming expertise.

Currently, I have a strong interest in local development, inspired by Inamori's principle: *'What is the right thing as a human being?'* Therefore, I seek a position that allows 100% remote work.

To validate my skills, I am more than willing to work on-site during the initial period until I pass the evaluation. Having previously been a team leader, I understand the risks involved in hiring personnel for a Work-from-Home model.

I sincerely hope we will have the opportunity to work together.

## WORK EXPERIENCE

T-Connect	<p>Development Pattern : JAVA, Spring boot, SQL Server, MySQL, AWS, Docker</p> <p>Role : Programmer</p> <p>Work Detail : Developed and fixed bugs in various functions using Java, and deployed to AWS Lambda and EC2. Lambda was used for APIs, and EC2 was used for the smartphone application. After development, testing was conducted using JUnit, and test documentation was prepared for project delivery.</p>
CAL (Car Auto Loan)	<p>Development Pattern : C#, MVC, SQL Server, IIS</p> <p>Role : Programmer</p> <p>Work Detail : Developed and fixed bugs in various functions using C# MVC and SQL Server, then deployed to IIS Windows Server.</p>
VB Converter	<p>Development Pattern : VB6, VB.net, C++</p> <p>Role : Programmer</p> <p>Work Detail : Developed and upgraded the system from VB6 to VB.NET, managed and assigned tasks to a team of 3-4 people, and created a tool to replace the old system. Decompiled libraries to ensure the application could function properly.</p>
Line Manament	<p>Development Pattern : PHP, MySQL</p> <p>Role : Freelance Programmer</p> <p>Work Detail : Developed a CMS integrated with the Line Message API to manage data for users connected to Line OA. The system supports various use cases, such as rental management, monthly cooperative systems, store advertisements, employee data, product management, and more.</p>
Ex-Face	<p>Development Pattern : Python, C++, MySQL, ML, RaspberryPi, Arduino, SolidWork, Proteus</p> <p>Role : Programmer</p> <p>Work Detail : Developed a face detection system using Raspberry Pi, Python, and Machine Learning. Designed the hardware, created the device through 3D printing, and developed the interface circuitry to connect the device with the controller.</p>
H-lite	<p>Development Pattern : Flutter, SQLite</p> <p>Role : Programmer</p> <p>Work Detail : Developed a mobile application for managing security systems in villages or condominiums by integrating APIs to collect and manage monthly data.</p>
KaiZen	<p>Development Pattern : VB.net, MVC, SQL Server, IIS, CrytalReport, Python</p> <p>Role : Programmer</p> <p>Work Detail : Developed an ERP website for internal management of import/export operations, inventory control, customer communication, and generating reports, quotations, and invoices.</p>
Bottle Keep	<p>Development Pattern : C#, MVC, SQL Server, IIS</p> <p>Role : Programmer</p> <p>Work Detail : Enhanced the warehouse system to a retail system by adding a membership feature, allowing customers to deposit and withdraw items from the store. The system still includes inventory management and monthly summary reporting.</p>

Mini BWare	<p>Development Pattern : C#, MVC, SQL Server, IIS</p> <p>Role : Programmer</p> <p>Work Detail : Developed a warehouse management system with a master data module to create product information for import/export. The system also includes inventory tracking, integrated with barcode scanners, and supports report printing.</p>
TrainSimulator	<p>Development Pattern : C#, SQL Server, Arduino, SolidWork, Proteus, PLC, TCPIP</p> <p>Role : Programmer</p> <p>Work Detail : Managed and led a team consisting of both junior and senior programmers. Developed a simulation program for a subway system, created an interface between the software and control devices, conducted testing, and provided training on system usage. Additionally, I prepared and delivered documentation for project completion.</p>
ZoneTalking	<p>Development Pattern : PHP, MySQL</p> <p>Role : Freelance Programmer</p> <p>Work Detail : Developed a website for tutors to upload their profiles and allow students to schedule online lessons. The system includes features for appointment management, payment processing, notifications, and progress summaries.</p>
Mordooclub	<p>Development Pattern : PHP, MySQL</p> <p>Role : Freelance Programmer</p> <p>Work Detail : Developed a website for fortune tellers and clients to have online tarot card readings via Line OA. The system includes a monthly membership feature, payment processing, and progress summaries.</p>
Market Place	<p>Development Pattern : Vue.js, SQLite</p> <p>Role : Freelance Programmer</p> <p>Work Detail : Developed a marketplace website for buying and selling products by customizing a pre-purchased theme. I focused primarily on developing the backend and managing additional features, with my main responsibilities being the payment system and order status management.</p>
